## Learning Support – Student Information

In order to provide the most appropriate learning support for those students who are experiencing difficulties with learning or behaviour, it is vital that school staff have access to information about each student's needs.

To achieve this, the Learning Support Team requests that parents/caregivers complete the following questionnaire regarding their child's specific needs. In addition, it is helpful if documentation such as reports, assessments, NAPLAN results etc. are provided.

Whilst access to such information is on a "need to know" basis and respects the sensitivity of any confidential issues, it is extremely useful if this information is conveyed to all of your child's teachers so that appropriate learning adjustments can be made in all subjects.
